

# Improve clinical care for patients in specialist practice

Better care coordination through My Health Record connectivity

**i** Did you know that My Health Record is designed to provide you with better access to key health information to support you in caring for your patients.

## Why use My Health Record?

Help improve clinical decision making

Avoid duplicate tests / scans / diagnostics

Medicine reconciliation tasks and prescribing

Help to inform end-of-life care decisions

Less administrative burden gathering information

Fewer adverse events for your patients

## What information may support your practice and patient care?

Shared health summaries which include a patient's:

- Medical history
- Medicines
- Allergies
- Adverse drug reactions
- Immunisations

Hospital discharge summaries

Pathology reports and diagnostic imaging reports

Medicines information such as:

- Prescription and dispense records
- Pharmacist shared Medicines List

Patient entered information including advance care planning documents

Medicare Information

## Access the My Health Record system

There are two ways to access a patient's My Health Record as a healthcare provider

### Conformant Software

You can upload, view and download information. A full list of My Health Record conformant software types can be found at [myhealthrecord.gov.au](http://myhealthrecord.gov.au)

### National Provider Portal

Access My Health Record securely via a web browser via logging in through [PRODA](http://PRODA). The healthcare provider will be able to view and download information but will not be able to upload any clinical information.

## Access training and resources

### General resources for specialists:

1. Go to [myhealthrecord.gov.au](http://myhealthrecord.gov.au)
2. Click on **For healthcare professionals**
3. Scroll down and click on [Specialist Practice](#)
